

Accutron, Inc.

Reach SVHC Policy

Accutron, Inc. supplies contract manufacturing services to a diverse group of clients. In doing so, we are committed to ensuring compliance with environmental regulations and standards as required.

Under REACH, certain substances are considered Substances of Very High Concern (SVHC). As of April, 2018, there are 183 substances on the SVHC candidate list. This list is subject to change by the European Chemicals Agency (ECHA): <https://echa.europa.eu/candidate-list-table>

Accutron, Inc. highly recommends that our Customers and Suppliers help ensure compliance with EU REACH and RoHS objectives. From our suppliers, we request the identification of components containing substances not in compliance with the REACH/RoHS directives. And, from our customers, we strongly urge addressing the REACH/RoHS directives at the design/redesign phase of the product by selecting materials that are in compliance with these directives.

To the best of our ability Accutron Inc. will ensure compliance to the Reach/RoHS directives for assemblies that are designed/redesigned to be compliant.
